SAAD UR REHMAN

Game Developer | AR & VR Developer

+923132274337, saadrehman264@hotmail.com, LinkedIn, Github, itsaad.dev Karachi, Pakistan

OBJECTIVE

AR/VR and game developer experienced in building immersive 2D/3D applications and simulations using Unity (AR Foundation, OpenXR) and Unreal Engine 5. Also experienced in developing and training AI models for computer vision, particularly convolutional neural networks (CNNs), including dataset preparation, model optimization, and evaluation for image classification and visual recognition tasks.

EDUCATION

Feb 2021 - Feb 2025

Bachelor of Science in Software Engineering
University of Karachi, Karachi.

SKILLS & ABILITIES

Technical Skills:

Game Engines: Unity 3D (C#), Unreal Engine 5 (Blueprints), PlayCanvas, Real-Time Rendering, Lighting, Physics

AR Development: Unity AR Foundation, Vuforia, ARCore, ARKit, DeepAR, OpenXR, Geospatial Anchors, Image/Object Tracking, Scene Understanding

VR/XR Development: Unreal Engine 5 VR Template, Blueprint VR Interactions, VR Pawn, Motion Controllers, Enhanced Input, Teleportation, Smooth Locomotion, Physics-Based Grabbing, 3D UMG Widgets, OpenXR, Meta Quest/HTC Vive, Unity XR Interaction Toolkit, LOD & Level Streaming

AI & Computer Vision: Python, OpenCV, NumPy, Pandas, PyTorch, TensorFlow/Keras, YOLO, Object Detection, Image Classification, Segmentation, Data Annotation & Augmentation, Model Training & Fine-Tuning, Evaluation Metrics, ONNX

Mobile & Web Development: Flutter (Dart), React, Next.js, Astro.js, Firebase, RESTful APIs, JSON, Responsive UI, State Management

Cloud & Backend: Firebase, AWS (EC2, S3, SMTP), Supabase, n8n, cPanel, Linux (Ubuntu/CLI), Cloud Architecture Fundamentals

Creative & Design Tools: Adobe Illustrator, Photoshop, UI/UX Design, Figma, Blender Basics, Spline

Tools & Platforms: Git, GitHub, VS Code, Android Studio, Postman

Soft Skills:

Attention to Detail, Analytical Problem Solving, Team Collaboration, Quick Learner.

CERTIFICATES

Game Development - LearnEasy.pk (Innovista)

Completed a practical game development course covering Unity fundamentals, C# scripting, and 2D/3D game mechanics. Built playable projects to apply core concepts of game design, physics, animation, and player interaction.

Flutter Development - Hazza Institute of Technology

Completed a comprehensive Flutter course focusing on Dart programming, widget-based UI design, and Firebase integration. Developed cross-platform mobile applications through hands-on projects.

Cloud Solution Architecture - Hazza Institute of Technology

Completed an in-depth course on AWS services, Linux server management, and scalable infrastructure design. Gained practical skills in deploying cloud-native applications and implementing security best practices.

MERN Stack Development - Saylani Mass IT Training Program

Completed an intensive MERN Stack course covering MongoDB, Express.js, React.js, and Node.js. Built full-stack web applications, implemented RESTful APIs, and managed databases.

EXPERIENCE

Jr Game Developer

Techversol - Karachi, Pakistan
June 2025 - Present · Full-time, Onsite

Game Developer Intern

Apr 2025 - May 2025 · Internship, Onsite

Contributed to the development of interactive 2D and 3D games, as well as immersive AR/VR applications, utilizing Unity and Unreal Engine to deliver engaging user experiences across multiple platforms.

- Developed and optimized 2D/3D games using Unity for mobile platforms.
- Built AR applications in Unity and Unreal Engine using marker-based, markerless, Google Cloud Anchors, and Geospatial Anchors.
- Created VR simulations in Unity and Unreal Engine for Oculus Quest and HTC Vive with realistic, interactive environments.
- Improved performance using level streaming and LOD systems to ensure smooth, responsive XR experiences.
- Developing and training CNN-based computer vision models.

Game Developer Intern

Linchpin Global - Karachi, Pakistan
Nov 2024 - Feb 2025 · Full time, onsite

Developed AR applications using Unity and Vuforia, implementing both marker-based and markerless tracking solutions for real estate visualization.

- Created immersive VR environments using Unity XR Toolkit and OpenXR, optimized for various headsets including Oculus Quest
- Built 360° virtual tours and interactive walkthroughs in Unreal Engine 5, enhancing real estate and architectural visualization with cinematic lighting and navigation systems.
- Integrated interactive 3D models, UI components, and spatial audio to enhance user immersion in XR experiences.

Data Automation & Reporting Specialist

Billing Expert - Pearland, USA
Jan 2023 - Jan 2024 · Full time, Remote

- Designed and maintained interactive Power BI dashboards to visualize key business metrics, enhancing decision-making processes.
- Automated data entry workflows using Power Automate and N8N, reducing manual input errors and increasing operational efficiency.
- Integrated multiple data sources, including Excel and SQL databases, ensuring real-time data synchronization across platforms.
